

The Situation before the project

Every third young person with arthritis in Germany stops therapy when he or she enters adult care!

Project Aim and Target Groups

Goal:

- To achieve that young people with arthritis make the transition from children's care to adult care without breaking off their therapy.

Target groups:

- Young persons with arthritis, parents, doctors

The Project 2014 - 2017

| Young people with arthritis (16-20) | Parents | Doctors |
